## About this Guide

eScan Mobile Security for Android is a user-friendly application that protects your Android device from vulnerable threats such as viruses and other malware applications. It also includes exclusive features such as Call Filter and Anti- Theft.

eScan Mobile Security for Android allows you to trace your device location or raise an alarm in case of loss / theft. The parental control feature provides an extra layer of protection by blocking unwanted website categories. With App Lock you can restrict unauthorised use of apps. With all these robust features, eScan Mobile Security for Android will set new standards for protection as well as performance of Android-based devices.

## With eScan Mobile security you can perform following activities –

- The Anti-Virus Scan feature will scan your device on real-time basis and also scans your device on installation of any new application, or on downloading applications.
- The Call Filter feature enables you to filter incoming calls.
- The Backup feature lets you take a backup of your Contacts on to the device internal storage or onto the Cloud (Google Drive).
- The App Lock feature will secure your Android device from any unauthenticated access to any applications.
- The Anti-Theft feature will allow you to remotely block your phone, wipe off all personal details, send notification if SIM is changed and also raise a loud alarm on the device in case your device is lost / stolen.

## Features added:

- Anti-Virus
- Call Filter
- Backup
- Anti-Theft (**Improved**)
- Parental Control
- App Lock
- Privacy Advisor
- Battery Saver
- Speed Test
- eScan Widgets (**New**)

## System Requirements

Prior to installation, your device must meet the following criteria:

- **Operating System:** Android 5.0 and above
- **Minimum Disk Space :** 40-50 MB
- **Others:** Internet connection

## Installation

eScan Mobile Security can be installed on to your device by the following methods:

- Go to Play Store and search for “**eScan Mobile Security**” aSelect the application and tap **INSTALL**
- OR
- Download the .apk file for eScan Mobile Security for Android from this link <http://download1.mwti.net/download/escan/android/escantmo.apk>.
- Save the file to your phone internal storage or memory card and tap on the .apk file to install.

## Features of eScan Mobile Security for Android

### Anti-Virus

eScan Anti-Virus scans your device on real-time basis and provides security against malware, Trojans, and other cyber threats to your Android-based Smartphones. It automatically scans all newly downloaded and installed applications on your mobile device, thus keeping your device safe from unwanted infections. Anti-Virus allows automatic and scheduled scanning. It helps you scan the complete device, for all app/apk files stored on the device.

- **Scan:** This option will enable you to perform different types of scanning such as full scan, folder scan, and memory scan. Tap an appropriate option, as per your requirement.
- **Settings:** This option will allow you to define the Scan settings and will allow you to schedule a scan.

### Call Filter

The Call Filter enables you to filter incoming calls. You can specify numbers that you want to whitelist and blacklist. You can manage filtering from the following settings:

- **Mode:** This option will allow you to set the mode to as to disable all filters, Blacklist, Whitelist or set to Both Lists.
- **Blacklist:** This option will block all Blacklisted calls to the device. You can also add % wild card character to block calls from any particular series. This is applicable only if the Call Filter is set to Blacklist or Both Lists.
- **Whitelist:** This will allow all Whitelisted calls to the device. You can also add % wild card character to allow calls. This is applicable only if the Call filter is set to Whitelist or Both Lists.

## Backup

This feature lets you take a backup of Contacts on device internal storage or onto the Cloud (Google Drive) and lets you restore that backup as per your requirement.

## Parental Control

Parental Control provides an extra layer of protection to your Android Device. You can block access to a specific category of websites.

- **Mode:** This option will allow you to set the mode to Block Websites and SafeSearch.
- **Block Websites:** This option will display the list of pre-defined categories of websites that are blocked and will also display the categories of websites that are allowed. Website blocking feature is only supported while using the Native Android Browser, Google Chrome or S Browser.
- **SafeSearch:** It sets the Chrome browser to the Safe Search mode, and helps filter out explicit content in Google's search results

## App Lock

Allows you to lock applications. The locked applications will ask for password when opened. If the "Allow permanently" option is selected, eScan will not ask for password every time the app is opened.

## Anti-Theft

The Anti-Theft feature prevents any unauthorized access in case your Android device is lost or stolen. This feature comes with options such as Lock, Data Wipe, Locate, Scream, SIM Watch, Lock Watch, Motion Alarm etc. The features Lock, Data Wipe, Locate and Scream can be activated via Cloud portal (only if they are enabled on the device).

- **Lock:** This option will allow you to lock the device remotely via Cloud portal.
- **Data Wipe:** This option will allow you to delete all your Contacts and selected data from the device via Cloud portal.
- **SIM Watch:** This option will allow you to trace the mobile device in case of a SIM being replaced after a loss or theft. The app sends an email, specifying the details of the new SIM and its location.
- **Locate:** This option will allow you to locate your device in case of loss or theft. This function is activated via the Cloud portal. A location map can be viewed along with the last located date and time of the device.
- **Lock Watch:** This option will capture a photo of the current user from the front camera on failing the unlock attempt for more than twice.
- **Scream:** This option will raise a loud alarm on the device when given a command via Cloud portal. You can stop the screaming by entering the secret code.

## Speed Test

This option will show the upload and download speed of the available internet connection.

## Privacy Advisor

This option will display the complete list of applications using the device permissions. It will allow you to keep a check on the security level of the application. For example, if you tap '**Your location**' option from the list provided in the **Privacy Advisor** screen, it will display the list of applications that have access to your location.

## Additional

Additional setting consists of the advanced application settings such as changing the secret code, sharing eScan app, enabling and disabling notifications, sound notifications, write logs, clear logs and uninstalling eScan.

## Widgets

It allows quick access to Scan, Anti-Theft Status and allows you to optimize device.
